**GENERAL SITUATION**

Until Tuesday, a broad low pressure centred over the western Mediterranean will bring unsettled conditions across the region, with typical spring-like weather. From Wednesday onwards, drier north-easterly winds will establish greater stability.

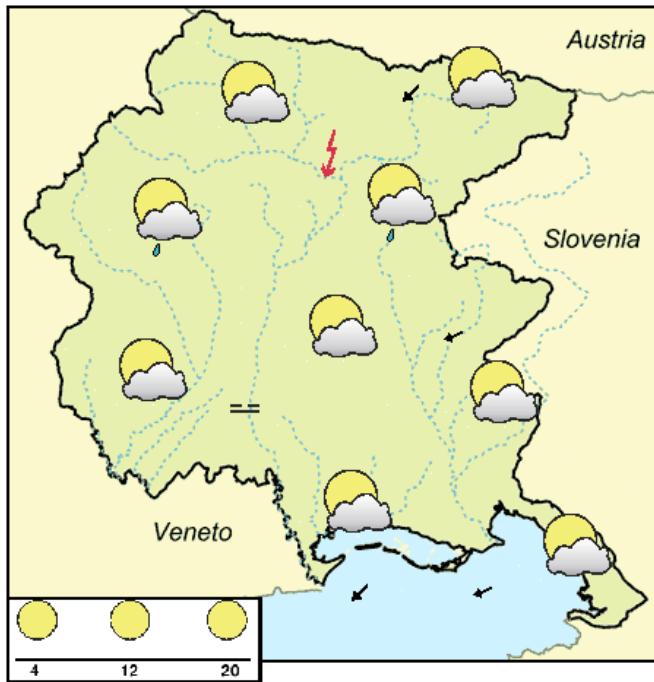

**TUESDAY, 25 March 2025**

Reliability 60%

A variable sky is expected. From mid-day onwards, scattered showers or rain are possible, initially developing over the mountainous areas before potentially spreading to the plains and, with lower probability, to the coast during the afternoon. Isolated thunderstorms cannot be ruled out. Snow level around 1700-1800 m. Overnight, mist or fog patches may develop, particularly over the lagoon area and the Pordenone plain near the Veneto border.

**WEDNESDAY, 26 March 2025**

Reliability 60%

Variable sky. In the afternoon, scattered showers or rain are possible over the mountainous areas, particularly in the Prealps, and isolated thunderstorms cannot be ruled out. Moderate north-easterly winds at altitude, with moderate Bora along the coast and eastern areas, possibly bringing strong gusts in the evening. Overnight and into the morning, mist or local fog patches may develop.

**TENDENCY**

From Thursday onwards, more stable conditions with predominantly clear or partly cloudy skies. A strong north-easterly wind at altitude, with a moderate Bora along the coast, bringing strong gusts in Trieste.
